

HomePure COMPLETE WATER LINE

Enjoy clean, safe,
and nourishing
Pi-Water
every day.

Sediments

Hard Water

THE QUALITY

of water supply in many countries was brought under the spotlight due to recent economic concerns and the environmental impact of climate change. While you may not be able to control those factors, you can definitely **control the quality of water in your home**.

Based on over 10 years of experience and research on water quality in many countries, HomePure understands that water quality varies depending on the location. We found two major water quality problems to-date: **fine sediments and hard water**. These factors can prevent your water filter from working at optimum performance.

As a solution, we proudly present the **HomePure Complete Water Line** – a range of water filtration products that will ensure clean, safe, and nourishing **Pi-Water** in your home every day.

User-friendly

It comes ready-to-install, and its cartridge is easily replaceable.

No electricity required

Reduce energy consumption and household spending.

Safety guaranteed

All products are tested and certified by international independent third-parties.

World-class Quality

Developed in Germany. Manufactured in South Korea.

Environmentally-friendly and Cost Effective

Use reusable water bottles to reduce plastic waste and save money.

HomePure COMPLETE WATER FILTRATION SYSTEM

Recommended
for use with
tap water, hard water
and water sources
with fine sediments.

HomePure Complete Water Filtration System optimises the performance of the HomePure 9-Stage Filter Cartridge for up to 5,000 litres or 12 months, whichever comes first. It removes fine sediments from your tap water and decreases its hardness level, turning hard water into clean and nourishing soft water

HomePure Complete Water Filtration System:
HomePure Nova Water Filtration System + HomePure Prefilter 1-mc + HomePure NovaSoft Starter Set

Recommended
for use with
water sources with
high levels of
sediment.

HomePure POWER 1 DUO SET

HomePure Power Duo Set-1 is an advanced water filtration solution for water sources with fine sediments as small as 1 micron - particles too small to see with the naked eye. This combo will ensure that your HomePure Nova's 9-Stage Filtration System avoids premature clogging, allowing it to reach its optimum lifespan of either 5,000 litres or 12 months, whichever comes first.

HomePure Power Duo Set-1:
HomePure Nova Water Filtration System +
HomePure Prefilter 1-m

Recommended
for use with
hard water.

HomePure POWER 2 DUO SET

HomePure Power Duo Set-2 effectively reduces the level of hardness in your water supply before streaming it into the HomePure Nova, converting your hard tap water into safe and nourishing Pi-Water.

HomePure Power Duo Set-2:
HomePure Nova Water Filtration System +
HomePure NovaSoft Starter Set

WHAT IS PI-WATER?

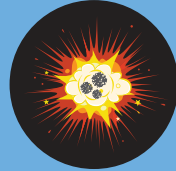

THIS WATER PLAYS A KEY ROLE IN REGULATING IMPORTANT FUNCTIONS IN LIVING BODIES, LIKE:

Triggering
a plant to flower

Stimulating
an immune response

Destroying
free radicals

PI-WATER WAS DISCOVERED IN 1964 BY DR AKIHIRO YAMASHITA, AND IS VERY SIMILAR TO THE WATER THAT CONSTITUTES ALL LIVING ORGANISMS – **‘LIVING BODY WATER’**.

STAGE #4

of your HomePure Nova Water Filtration System makes Pi-Water. The water is treated with Pi-Water ceramic balls to mimic living body water and transform it into Pi-Water.

THE BENEFITS OF PI-WATER

- Rapidly absorbed and deployed in the body
- An antioxidant and detoxifier
- Supports protection and renewal
- Promotes optimal health and well-being
- Reduces fatigue
- Improves taste
- 100% natural

Conversion of ordinary water into living body water consumes a lot of energy. Pi-Water consumes less energy and is absorbed by the body easily.

Because Pi-Water is similar to “**living body water**”, it allows the body to better absorb the oxygen from the water molecules.

YOUR EVERYDAY WATER CAN BE PI-WATER
